

Worksheet 18: Tips for Dealing with 'Bullying'

Student name: _____

Teacher: _____ Class: _____

Students should research what is 'bullying', what effects it has on people, where does it happen, characteristics of a bully and who are the most likely to be bullied.

Students should develop a number of *Tips* for dealing with bullying behaviour for two different audiences:

- other students
- parents – the advice to them would be how to detect if your child is being bullied and ways of helping him/her.

These tips should be suitable for sending as a series of text messages to a mobile phone, so make each one as concise as possible.
